

T5 FLT Fluorescent Lighting Series

The FLT Series T5 Light system is the standard T5 system in the PARsource line.

The FLT Series T5 lighting system is an energy efficient, highly reflective system that utilizes T5 fluorescent tubes for high output and performance.

This system allows you to choose multiple hanging configurations to meet your growing needs.

The T5 fixture generates more than double the light energy compared to a typical T12 fluorescent system.

This system comes in multiple sizes and includes our AgroBrite™ high Output 6400K daylight spectrum bulbs.

See reverse side for product details.

T5 System hung horizontally

Features

- Variety of sizes to fit many growing needs
- High performance specular aluminum reflectors for highest output
- Low profile
- UL Listed components
- Powder coated steel housing
- Hangs 3-ways—overhead, vertical or horizontal for hanging flexibility
- Dual on/off switches on 6 and 8-tube models and three on/off switches for 12-tube fixtures to regulate light output
- 5-year ballast warranty, 1-year bulb and reflector warranty

Includes

- Power cord
- T5 lamps

Applications

Indoor Growing

Vertical Farms

Propagation

Crop

Algae

House Plants

Herbs
